1125 EASY-FOLD BIKE STAND

This is the finest stand we've ever seen! This pro-quality, versatile work stand has a rock-solid base with a removable work stand. From simple routine maintenance to complete overhauls, anyone can benefit from a stable work platform.

This is the finest stand we've ever seen! This pro-quality, versatile work stand has a rock-solid base with a removable work stand. From simple routine maintenance to complete overhauls, anyone can benefit from a stable work platform. When deciding on which product to carry we analyzed many factors, cost, stability, quality, etc.

After talking to multiple riders, repairmen, and bike distributors, we elected to go with the slightly more expensive, but more robust, Ultimate Bike Stand. The rigid "ironing board" design allows a secure base for the toughest wrenching. In our opinion these are much more robust and versatile than the inferior "bipod" or "tripod" design you regularly see on the market.

Features: Exclusive Tool Caddy

The tool shelf is great for holding those extra parts and/or wrenches. You no longer have to set your tools on the grass and watch them disappear.

Fast Clamp System

The Clamp has an innovative Secure-Lock that features a spring loaded clamp which will secure your bike tightly.

Extremely Portable

The Pro Elite weighs only 16 lbs. and it can be compacted--folded down like an ironing board--for travel and storage.

Maximum Stability

The Ultimate Bike Stand is one of the most robust and sturdy stands on the market. We believe this stand is the most advanced on the market.

Extra Durable

The Ultimate Bike Stand features the finest materials and proven reliability. We stand behind every product we sell and this is a great professional-quality repair stand.

Additional Features:

- Our advance locking mechanism allows quick placement of bicycle in stand
- Unique soft over-molded "plastic" jaws prevent damage to your bicycle
- Load capacity 90 lbs. (40 kg)

- Weight 16 lbs. (7 kg)
- **1-year warranty**
